User Manual

Eastar Jet Logistics & Supply Management System

For: All Branch Staff & Administrators | Language: English | June 2026

1. System Overview

ZEGO is a web-based system for integrated management of transport forms and supplies across all Eastar Jet branches.

Managed Form Types

Category	Form Name
Passenger Docs	Declaration of Indemnity (Musical Instrument)
Passenger Docs	Declaration of Parent/Guardian
Cargo Docs	Firearm Handover Form
Special Cargo	NOTOC (Notification to Captain)
General Supplies	X-banners, stanchions, notices, boarding passes, etc.

Stock Status

Color	Status	Meaning
Green	Normal	Above minimum threshold
Yellow	Low	Qty > 0, at/below minimum
Red	Empty	Qty = 0

2. Login & Password

- 1 Open the ZEGO website in your browser
- 2 Enter your ID and password, then click Login

Initial password: \$eastar12 — You must change it on first login.

A warning banner appears 7 days before your password expires.

3. Dashboard

First screen after login. Shows stat cards, stock alert tables, recent transactions, and a 6-month outbound trend chart.

4. Inventory Status

Click Inventory in the left menu. There are 4 tabs.

Tab 1 — Branch Detail

Shows current stock for all branch-form combinations. Edit minimum threshold by entering a number and pressing Enter — saves for that branch only.

Tab 2 — Branch View (Admin only)

Accordion panels per branch. Minimum thresholds can be set per-branch independently.

Tab 3 — Form Summary

Total stock grouped by form type. Click branch count for per-branch detail popup.

Tab 4 — Monthly Consumption

Monthly outbound quantity trend for the past 6 months.

Minimum thresholds are managed per branch. Changing one branch's threshold does not affect others.

5. Inbound Processing

- 1 Click Inbound in the left menu
- 2 Enter branch, form type, quantity, date, notes
- 3 Click Process Inbound

If stock remains below minimum threshold after inbound, an alert is automatically generated.

6. Outbound Processing

- 1 Click Outbound in the left menu
- 2 Enter branch, form type, quantity, date, notes
- 3 Click Process Outbound

Cannot outbound more than current stock. An alert is sent automatically if stock falls below minimum threshold.

Cancelling an Outbound

If an outbound was processed by mistake, cancel it to automatically restore inventory.

- 1 Click Transaction History in the left menu
- 2 Click the Undo (undo) button next to the outbound record
- 3 Click Confirm Cancel in the popup -> inventory is restored immediately

Cancelled records appear greyed out with strikethrough and Cancelled badge. Cannot be re-cancelled or edited. Only the processing branch or admin can cancel.

7. Bulk Outbound

- 1 Click Bulk Outbound in the left menu
- 2 Select branch — form list appears
- 3 Enter outbound quantity for each form (0 to skip)
- 4 Enter date and notes, then click Bulk Outbound

Process multiple forms simultaneously in a single submission.

8. Branch-to-Branch Transfer

Used when a branch with insufficient stock requests forms from a branch that has surplus.

- 1 Click Branch Transfer in the left menu
- 2 Select destination branch, form, quantity, date
- 3 Click Request Transfer → status becomes Pending

The receiving branch will be notified by email. Please log in to the ZEGO site and process the request. Once processed, the requesting branch will receive the result by email.

Transfer Status Flow

Status	Meaning
Pending	Awaiting admin approval
Approved	Admin approved; awaiting receiving branch confirmation
Confirmed	Transfer complete; inventory updated
Rejected	Rejected by admin

9. Transaction History & Reports

View all inbound, outbound, and transfer records. Filter by branch, form type, transaction type, and date range.

Reports: branch stock status charts, monthly comparison, top outbound forms, branch quantity chart.

Demand Forecasting: estimates future depletion dates based on historical outbound patterns.

10. Catalog (Transport Items) Request

- 1 Click Catalog in the left menu
- 2 Enter quantity and click Add to Cart
- 3 Review in Request Cart and click Submit Request
- 4 Check progress in Request History

Requests are only possible during the request period set by the administrator.

11. Form Supply Request

- 1 Click Form Request in the left menu
- 2 Select form type, enter quantity and notes
- 3 Click Submit
- 4 Track progress in My Requests

Form supply requests are also subject to the request period configured by the administrator.

12. Admin Functions

User Management

Create, edit, delete accounts; set roles (Admin/Branch); assign branches; reset passwords.

Request Period Settings

Transport Forms tab: set form supply request period. Transport Items tab: set catalog request period.

Notification Badges

Menu	Badge Meaning
Branch Transfer	Number of pending transfer requests
Form Request Mgmt (Admin)	Number of unprocessed form requests
Request History (Admin)	Number of unprocessed catalog requests
